A warewasher so easy and advanced you'll forget all about it.

Scan to see the LXe performance

A warewasher that fits your needs?
That's advanced.

Advanced wash performance
and operation.

Easy to clean and maintain.

> > > Washing dishes is a dirty business ... literally. As a result, most restaurant, bar, coffee shop and care facility operators rarely give it a second thought, even though their current dishwashing solution could be costing them time and money they can't afford to lose.

That's where the Hobart LXe Undercounter comes in. The Hobart LXe has been designed from the ground up to fit well into your business; so well you can almost forget all about it.

Now your operation can choose from the Hobart LXe Undercounter or upgrade to the advanced energy-, water- and cost-saving possibilities offered by the Hobart Advansys™ LXe Undercounter, which is available in high-temp and low-temp models.

So if you're looking for a space-saving, easy-to-clean-and-maintain warewashing solution that could also save you money, look no further. The Hobart LXe and Advansys LXe are here.

> > > The Hobart LXe sports advanced new features that support best-in-class wash performance and save costs from energy and water usage. In fact, the Advansys LXe high-temp model can save you up to \$XX.XX per year.

Steam elimination

The Advansys LXe high-temp model includes Hobart-exclusive Energy Recovery technology. This advanced feature recycles hot water vapor produced during the wash and rinse cycle and uses it to preheat cold inlet water. Energy Recovery saves you not only energy, but also reduced steam released into the air, improving both the operator and customer experiences.

No chemical residue

The Advansys LXe low-temp model includes PuriRinse—a cold-water rinse after the chemical sanitizer cycle. PuriRinse is designed to remove chemicals that can affect the flavor and presentation of the food and beverages you serve.

Three cycles

Only with the Hobart Advansys LXe can operators choose from three different cycles—90, 120 and 215 seconds. Three cycles give operators the flexibility to clean lightly soiled ware quickly and still keep up during high-demand times.

Lower water consumption

The Hobart LXe is built from the ground up to save water. The LXe models use .74 gallons of water per cycle, and the Advansys LXe high-temp model uses only .62 gallons per cycle. The Advansys low-temp design uses slightly more due to the PuriRinse feature, coming in at 1.15 gallons per cycle.

Sense-a-Temp™ booster heater

The LXe and Advansys LXe high-temp models are equipped with Hobart-exclusive Sense-a-Temp booster heater technology, capable of delivering a 70°F rise in rinse-water temperature and ensuring your ware is properly cleaned and sanitized at 180°F.

> Smart Display technology tells operators when to add chemicals, delime, unclog the wash arm or request service.

> One-button operation for one goal: an easier and more effective undercounter.

> > > The Hobart LXe Undercounter has features and technology that make it remarkably easy to operate, clean and maintain.

Smart Display

Both the LXe and Advansys LXe feature improved displays that simplify operation and maintenance. In fact, the Smart Display on the Advansys LXe informs the operator of common maintenance operations like auto deliming or clogged wash arms without using complex error codes.

Improved wash and rinse arms

The LXe features redesigned, easily removable wash arms—useful for easy declogging, should it ever be necessary. Additionally, the Advansys LXe features snap-in rinse arms that are even easier to remove and install.

Easy access to controls

When service is needed, access is easy. Controls can be accessed through the top and front of the machine, reducing the time of service calls.

Deluxe strainer system

An extra-deep strainer system on the LXe keeps debris from entering the pump and motor area, preventing damage and costly maintenance. This deluxe strainer system is also easy to remove and clean.

> The auto-deliming function on the Advansys LXe removes mineral buildup on components, improving efficiency and longevity.

> Best-in-class cleaning performance. Hobart LXe machines feature redesigned wash nozzles to provide better wash pattern and rack coverage, providing cleaner ware for an improved customer experience.
