

>>> Air Curtain Refrigerators

Ideal For Use On The Tray Line

Controller Features a 30°F Pre-Chill Mode & SMART DEFROST™ System

Superior 3D Airflow Screen Pattern Keeps Food Cold With The Door Open

6" Heavy Duty Casters w/Stress Pads & Full Perimeter Bumper Protects Cabinet From Damage

Well known for providing application equipment, Traulsen's Air Curtain Refrigerators are no exception. Ideal for use along a tray line, these high quality units keep food safe and cold for ninety minutes or more with the door left open. They also include a number of features intended to make them mobile since they are rarely loaded and unloaded in the same place.

Important cool differentiating features include superior 3-D airflow, a "Pre-Chill" mode that allows the operator to pull milk, juice or other food items down to 30°F prior to tray make-up. Equipped with a SMART DEFROST™ System which provides Auto or On-Demand Defrost as well as Defrost Override. The SMART DEFROST™ System also allows for near continuous operation and seeks ideal defrost parameters to optimize food temperatures and energy consumption.

Add it all up. Outstanding performance, high quality cabinet construction, and value added design and operating features. That's Traulsen. Trusted.

Product Features & Benefits

>> Product Features

- Multi-3D Air Screen Provides Superior "Door Open" Performance
- Easy-To-Use Electronic Control and Digital Temp Display (°F & °C)
- Mobility: Recessed Side Handles, Full Bumper, Side Door Latch, Rear Mounted Push/Pull Handles and 6" Heavy Duty Casters w/Stress Pads
