

Heated Holding — C5

Pizza Series

We put space to work.™

See how good a heated cabinet can be.™

Metro® **C5™ Pizza Series** Heated Holding Cabinets hold pizza hot and maintain that “straight from the oven” taste. Double deep box capacity allows you to hold two 16” pizza boxes on each level, double the capacity of a standard holding cabinet. Simple and effective temperature controls, a unique passive humidity generation system, a powerful heating system, flexible slides and shelves that can hold just about anything, and a wide variety of configurations make C5 Pizza Series the ideal solution for the high volume pizza purveyor.

C5 Pizza Series—See how good a heated cabinet can be.™

C₁ Control.

Temperature

The easy-to-use dial puts you in control of cabinet temperature.

Reliable Readout

Measures and displays actual cabinet temperature even when the cabinet is off.
