

>>> Commercial Spacesavers

Ideal For Front-Of-The House Application

Store Aging & Fine Wine
Wine Cooler Operates @ 53° to 57°F

Several Door & Drawer Combinations To Choose From

Limited floorspace? No problem. The Traulsen Spacesaver product line is designed for use in a variety of commercial applications where both narrow width and shallow depth are required. Their elegant design makes them ideal for use in “Front-Of-The-House” applications, such as a behind a counter or in the bar area, where they will be in customer view. They can be installed either built-in or free standing. To best suit your needs, several different door and drawer configurations are available. That’s innovative refrigeration design that meets your limited floorspace needs.
