

# Mobile Retail Merchandising Solutions

## An innovative new series of mobile retail merchandising kiosks

These new designs from Multiteria provide a unique retail solution offering high style, flexibility and the creative use of exciting graphics in a small footprint. Providing a design that offers unlimited flexibility and aesthetic appeal, this kiosk platform can be outfitted for any specific retail environment.

Our modular kiosk can be designed for a Breakfast on the Go program, Smoothie program, Deli/Panini or Tex-Mex station, or any takeaway program where you would like to increase participation.

The unit's versatile design allows operators to roll it to any location to provide an additional revenue stream. It is customizable with options that are relevant to your food service program and can be outfitted with unique custom front panel graphic designs.

*Our **Breakfast Kiosk** helps address the challenges food service providers in education face in implementing a breakfast program that can assist in meeting students' nutritional requirements. The unit feeds 150 to 200 students with replenishment designed with inside storage space.*

*These attractive mobile retail kiosks can be advantageous to your food service program by providing a convenient grab-n-go program – perfect for in the classroom, off the bus or in the hallway.*
